Local Government

Agenda

- Why Low-code/No-Code?
- Power Platform Overview
- How can I get started on the Hack?
- Learning Resources
- Demonstration

Custom code isn't keeping up with business demand

500 million

new apps will be built in the next 5 years - more than all apps built in the last 40 years.¹

Tech talent limitations

Ground up software development takes time

Surging digital demand

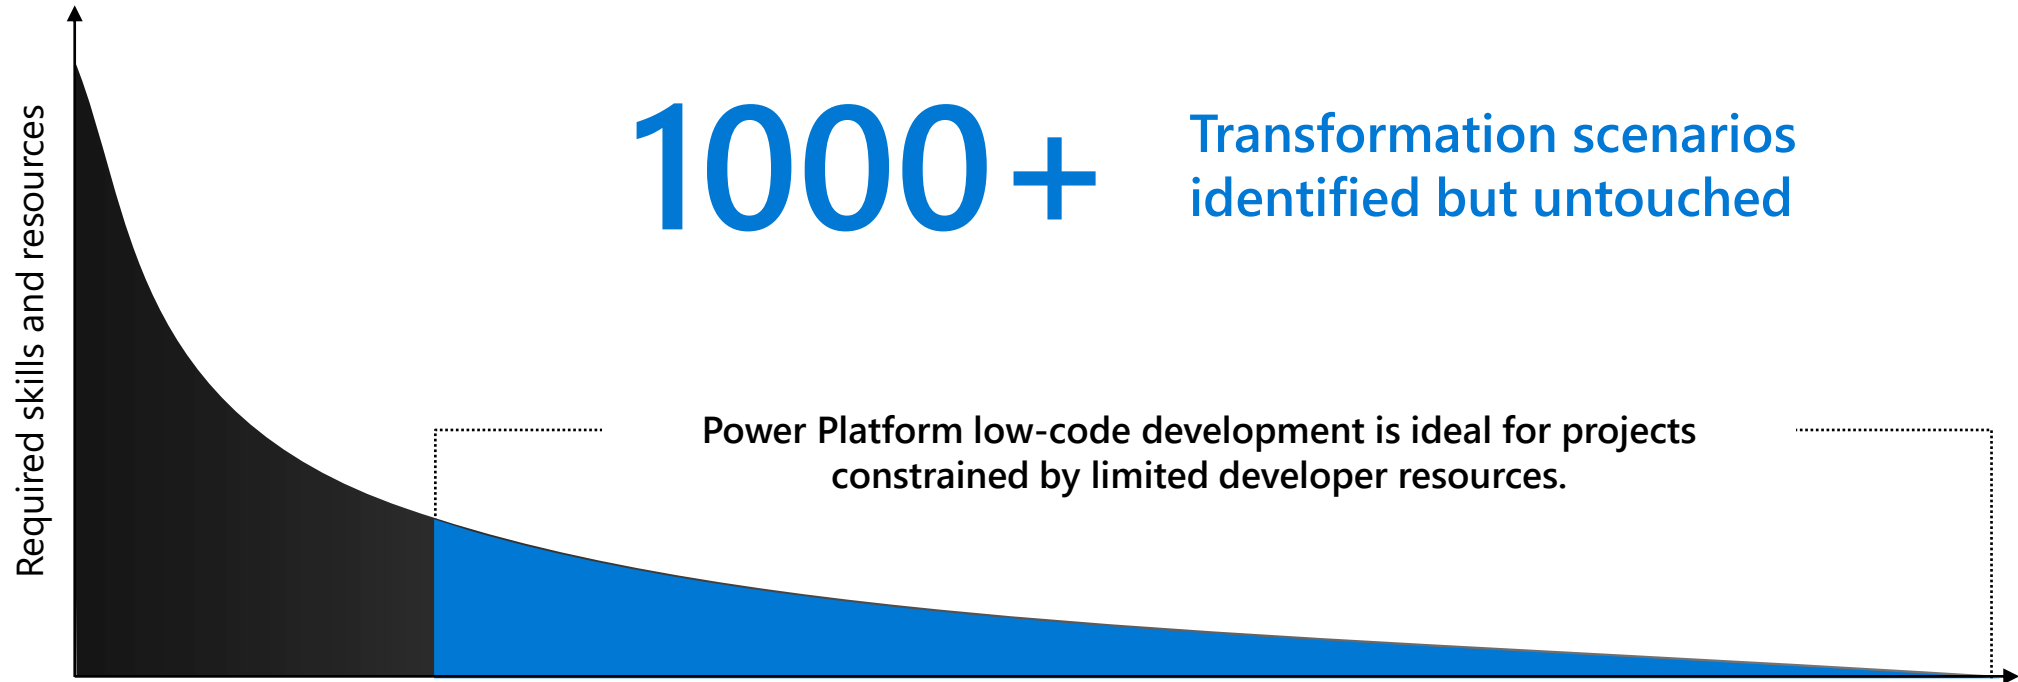

Security & compliance risks

70% of new applications developed by enterprises will use low code or no-code technologies by 2025. – Gartner²

1. IDC FutureScape: [Worldwide IT Industry 2020 Predictions](#). October 2019.

2. Gartner, Forecast Analysis: Low Code development Technologies. January, 2021.

Power Platform extends your development potential

The average cost to develop an app is 74% less with Power Platform than with traditional coding methods.

Microsoft Power Platform

The low-code platform that spans Office 365, Azure, Dynamics 365, and standalone applications

Power Platform in action

Address a wide range of business challenges

Everyone's platform for low code transformation

CITIZEN DEVELOPERS

Build solutions fast

Unlock data, automate processes and deliver insights using a simple, drag-and-drop platform and pre-built components.

PRO DEVELOPERS

Build without limits

Customize and extend your low-code solutions using popular development platforms.

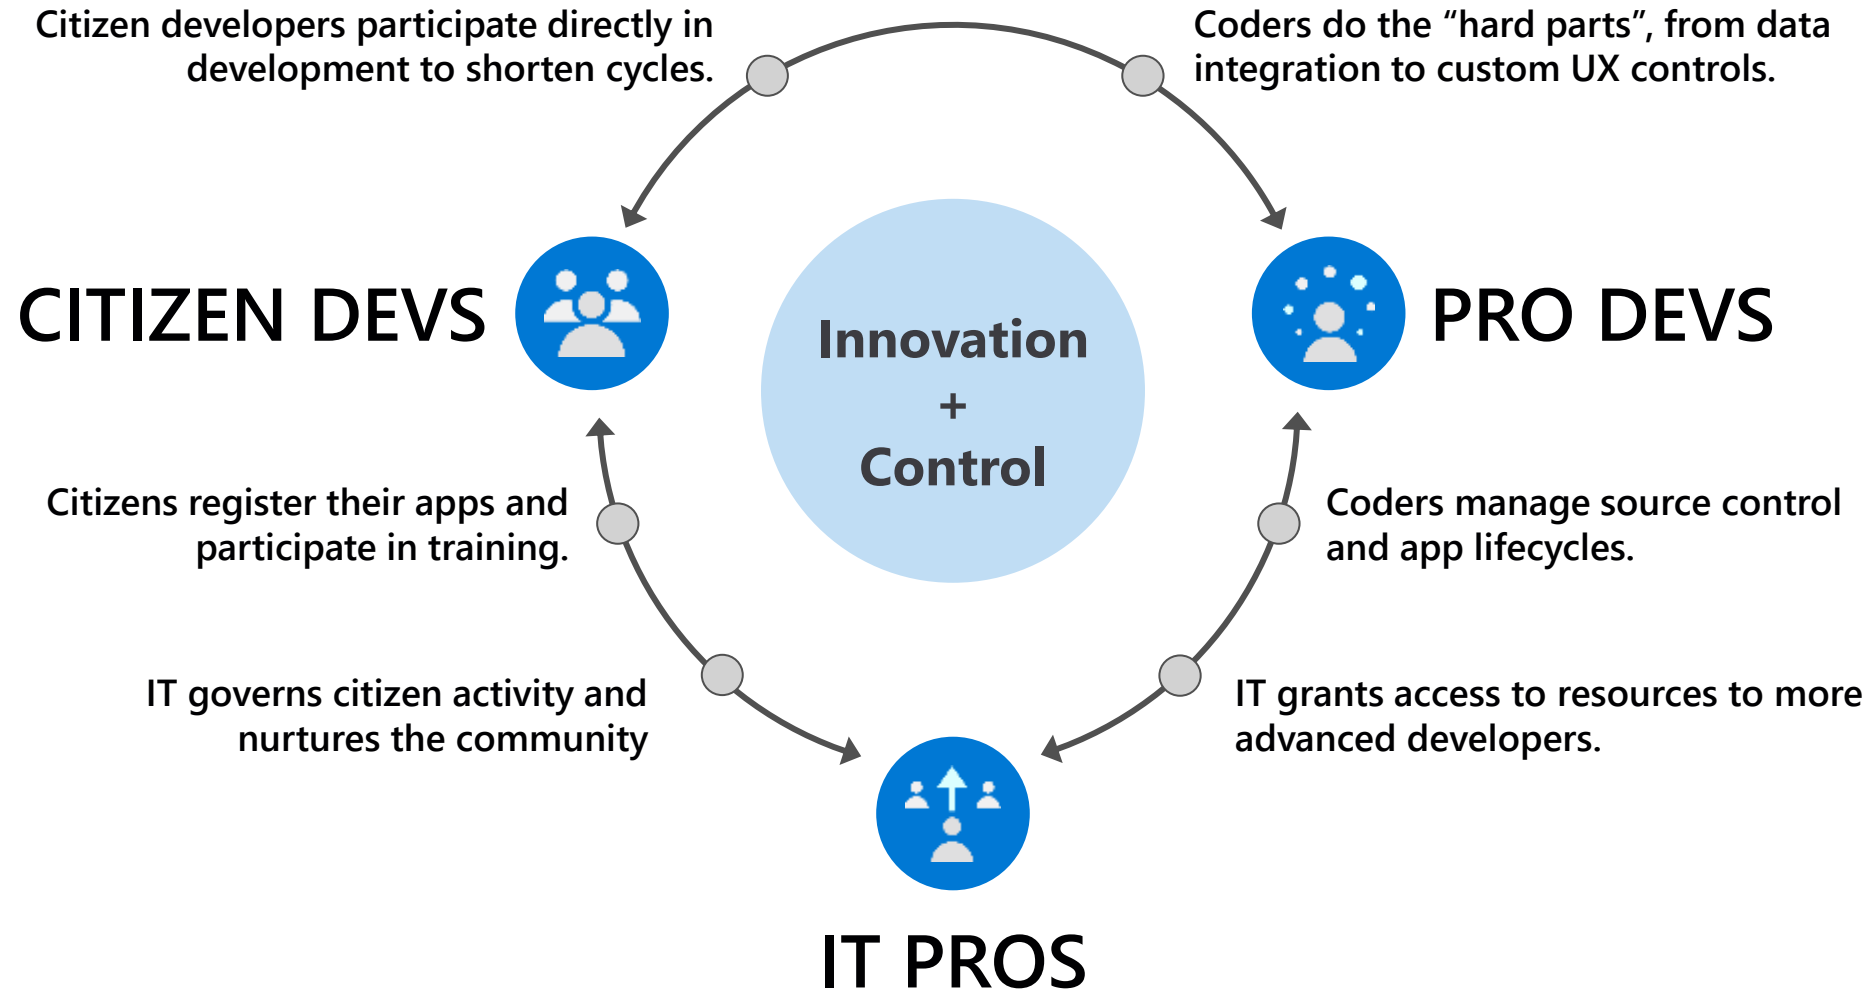

IT PROS

Maintain security and control

Add access, security and compliance guardrails to protect data, enforce standards and reduce the risk of shadow IT.

Power Platform development is a team sport

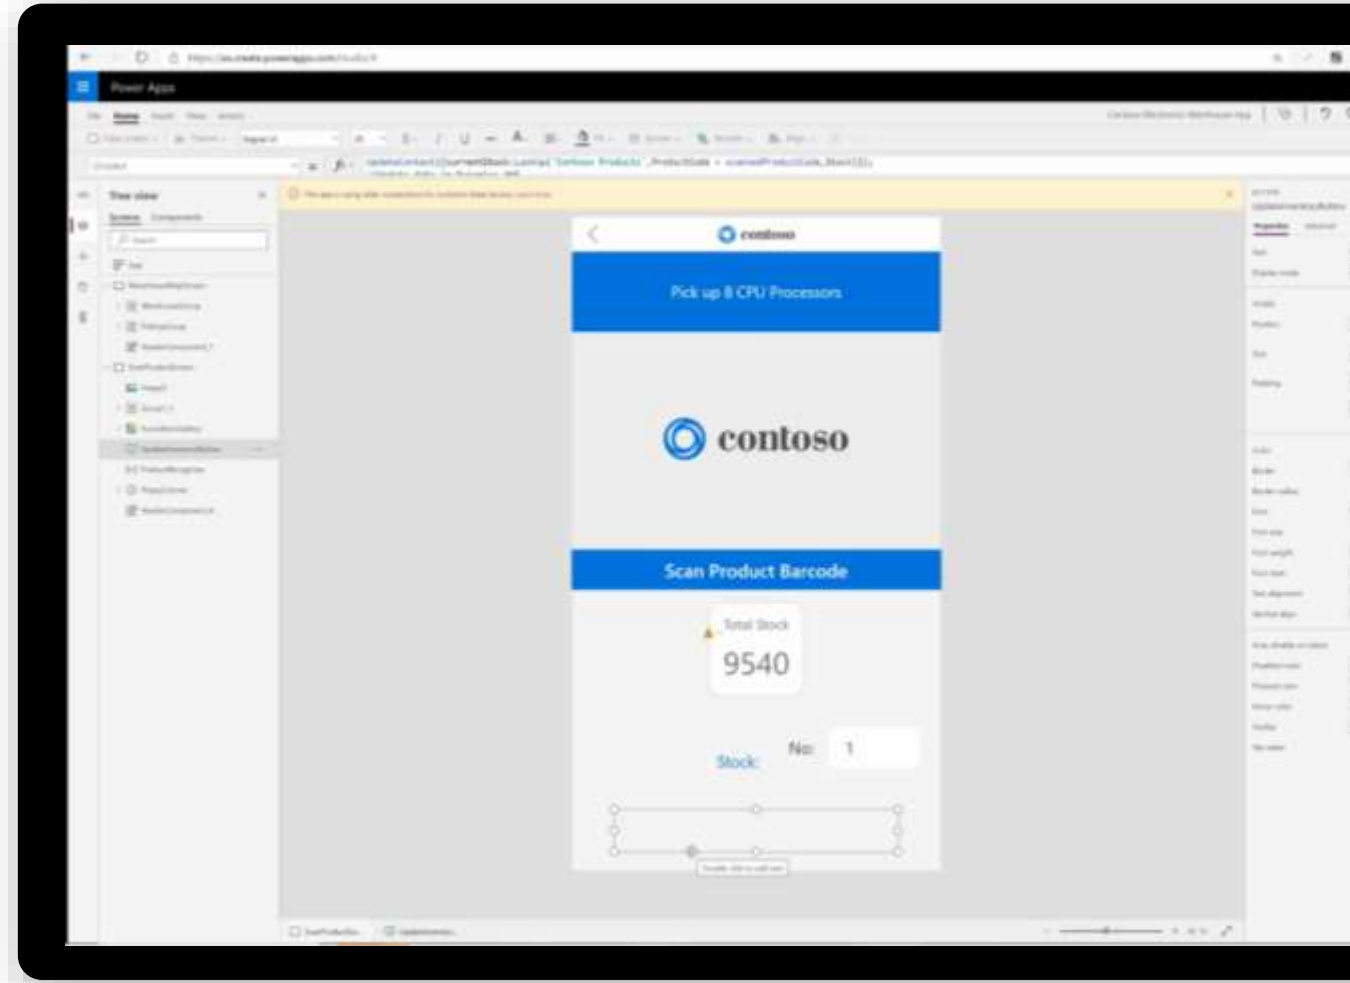

CITIZEN DEVS: Build solutions fast.

Power Apps

Empower everyone to create apps to solve business challenges

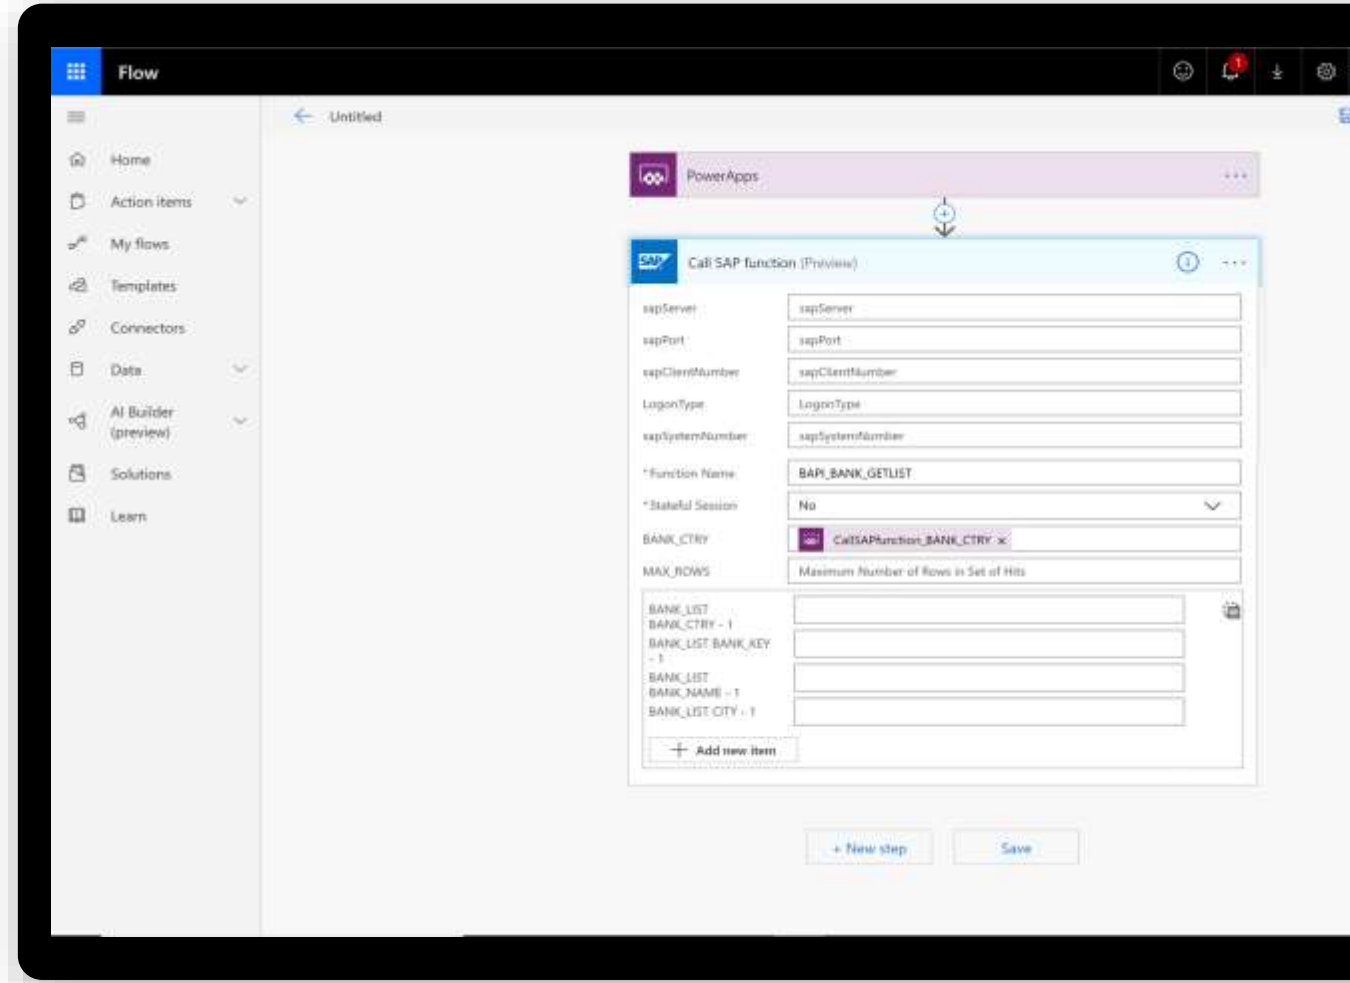

- Use Power Apps to **rapidly create web and mobile** front ends using a drag and drop UI.
- **Build once** and deploy apps in one click across iOS, Android, Windows, and Web.
- Customize every detail of an app to **optimize for specific tasks, roles, and industries.**
- Enable **pro developers** to create re-usable components to share with citizen developers
- **Connect** to data using pre-built or custom connectors.

Power Automate

Business processes across Power Platform

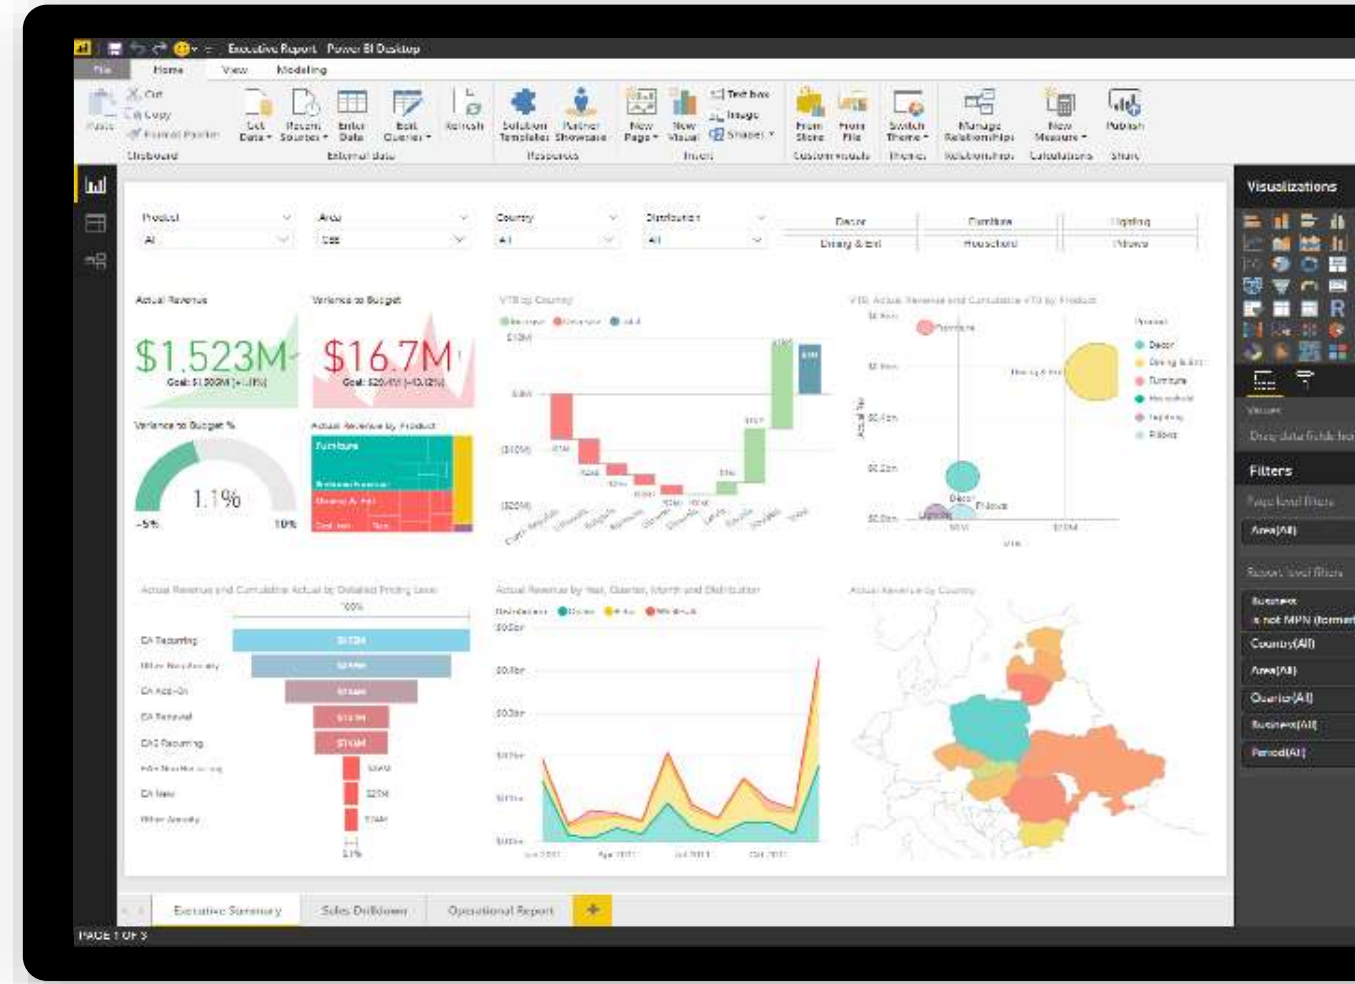

- Expand and improve business processes with integrated **RPA workflows**.
- **Send automatic reminders** for past due tasks.
- Move business **data between systems** on a schedule.
- Create a flow once and **enable makers** to use it across the Power Platform.
- Extend the automation capabilities in Power Automate to on-premises processes and tasks with **Power Automate Desktop**.

Power BI

Experience any data, anyway, anywhere

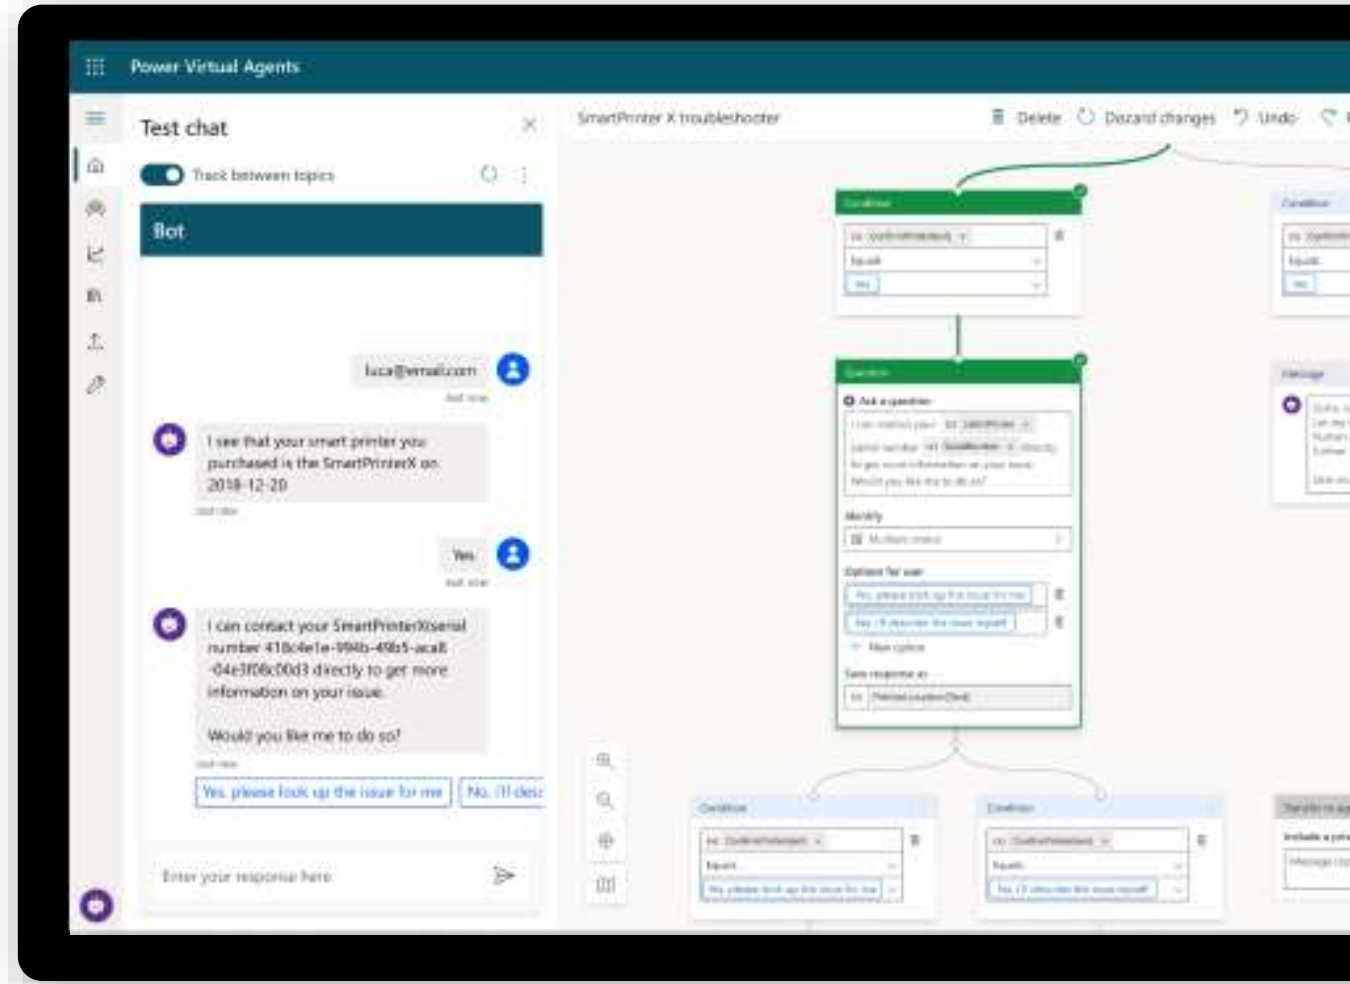

- Enable everyone to create real time dashboards & interactive reports using low-code tools and pre-built formats.
- Connect to hundreds of data sources from spreadsheets to on-premises data.
- Produce beautiful reports, then publish them for your organization to consume on the web and across mobile devices.
- Empower your organization with self-service analytics.

Power Virtual Agents

Build intelligent bots for customers and employees in minutes

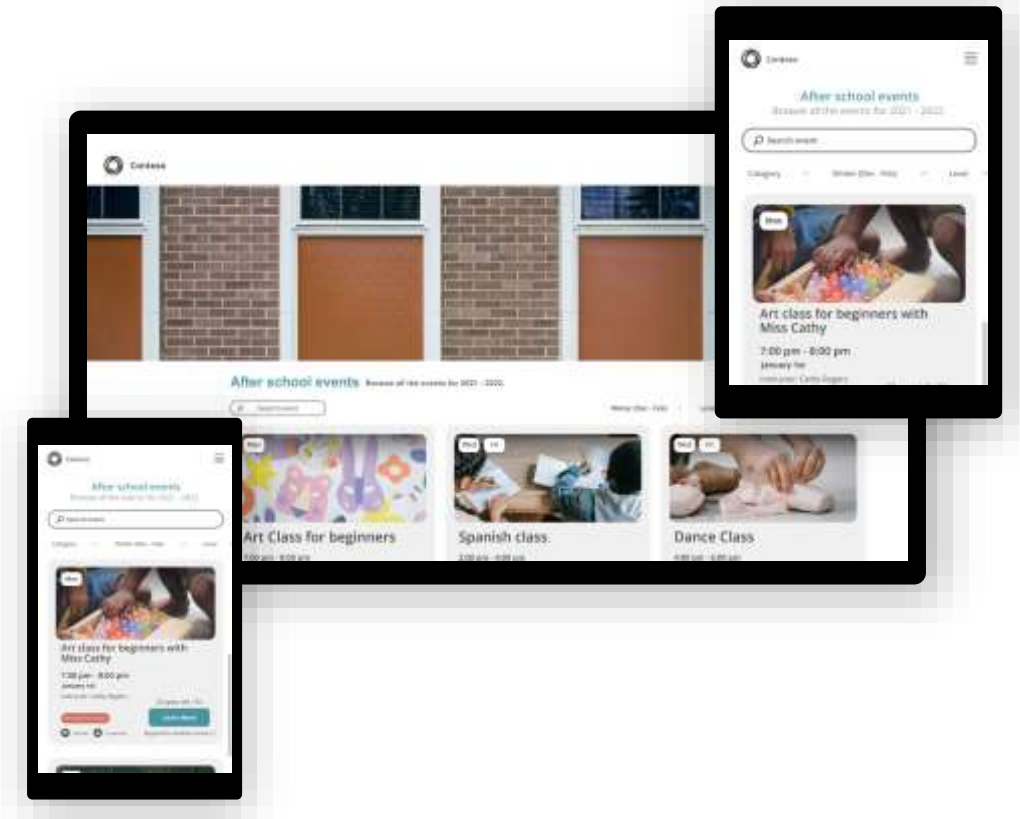

- Create and manage **powerful chatbots** without the need for code or AI expertise.
- Easily **integrate your chatbots** with the products and services you use every day.
- Look up records, personalize conversations, hand off conversations to live agents, and **call APIs**.
- Choose from hundreds of prebuilt connectors, build **custom workflows** using Power Automate, or create complex scenarios with **Microsoft Bot Framework**.
- Monitor and **improve your chatbot's performance** using AI and data-driven insights.

Power Pages

Create modern, secure, responsive business websites to rapidly engage your customers, partners, and communities

- **Make authoring easy for everyone**
Enable everyone in your organization to design and launch engaging websites – no coding required.
- **Build without boundaries**
Empower your developers with advanced, web design tools that can take your pages to a whole new level.
- **Share with confidence**
Manage all your sites through one, convenient dashboard and meet your most demanding security and compliance requirements.
- **Snap in exciting new capabilities**
Add dashboards, document sharing, chatbots, automation, and more for a smarter experience, with seamless integration to Power Platform and other Microsoft services.

Pre-built connectors

Connect to Microsoft and third-party data sources with ease

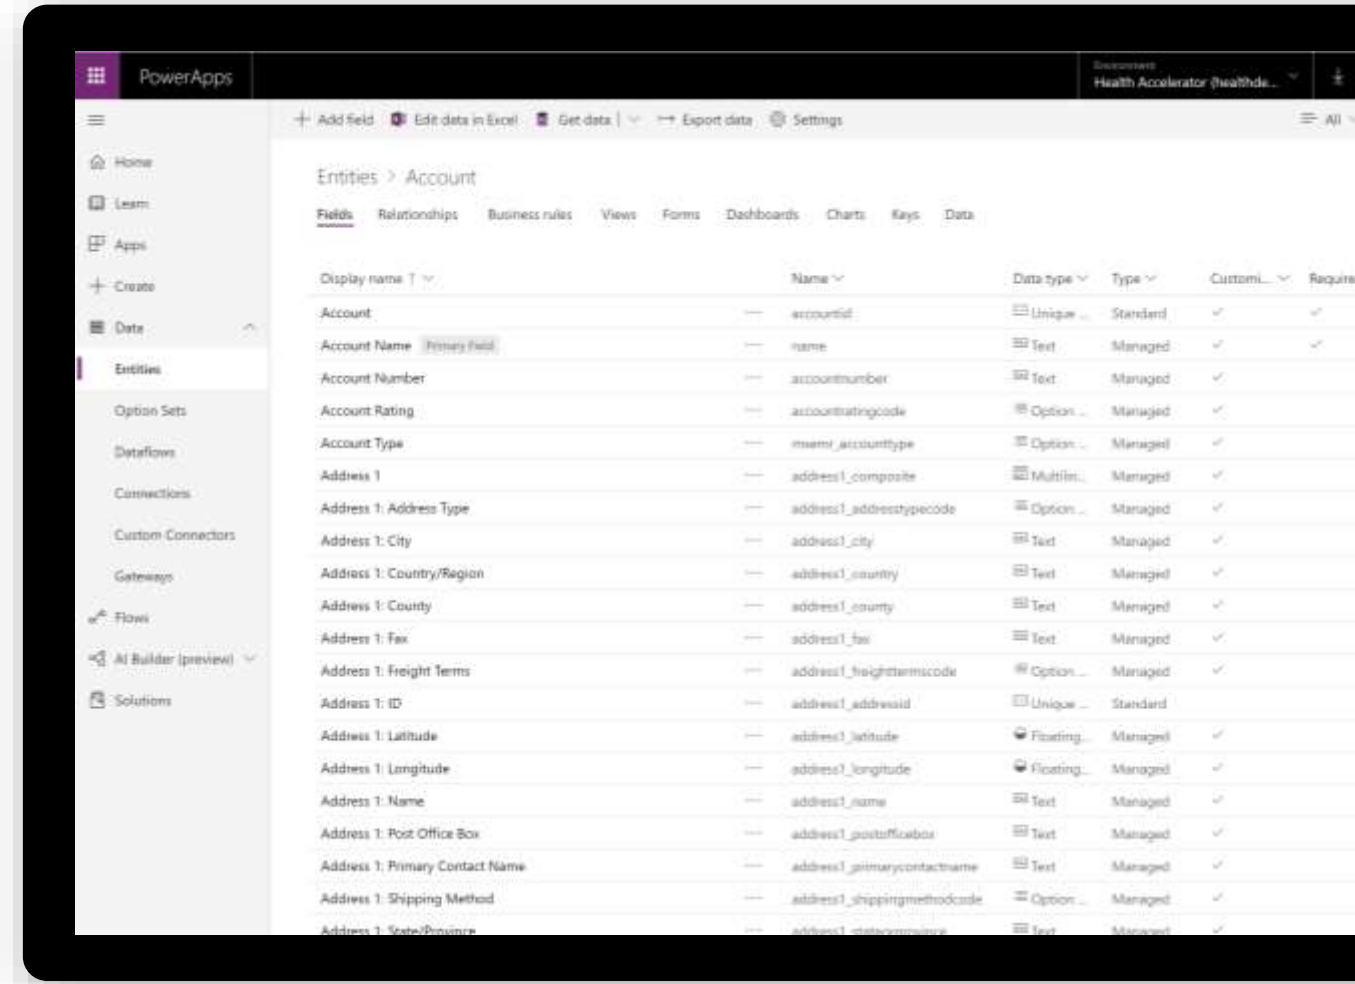

- Built-in, **out-of-box connectivity** to hundreds of cloud services, content services, databases, APIs, etc.
- Seamless **hybrid connectivity** to on-premises systems via the on-premises data gateway.
- Option to develop **custom connectors** as a building block for citizen developers.
- **Connect data silos** by unifying multiple data sources in a single application.

Dataverse

Put all your data to work

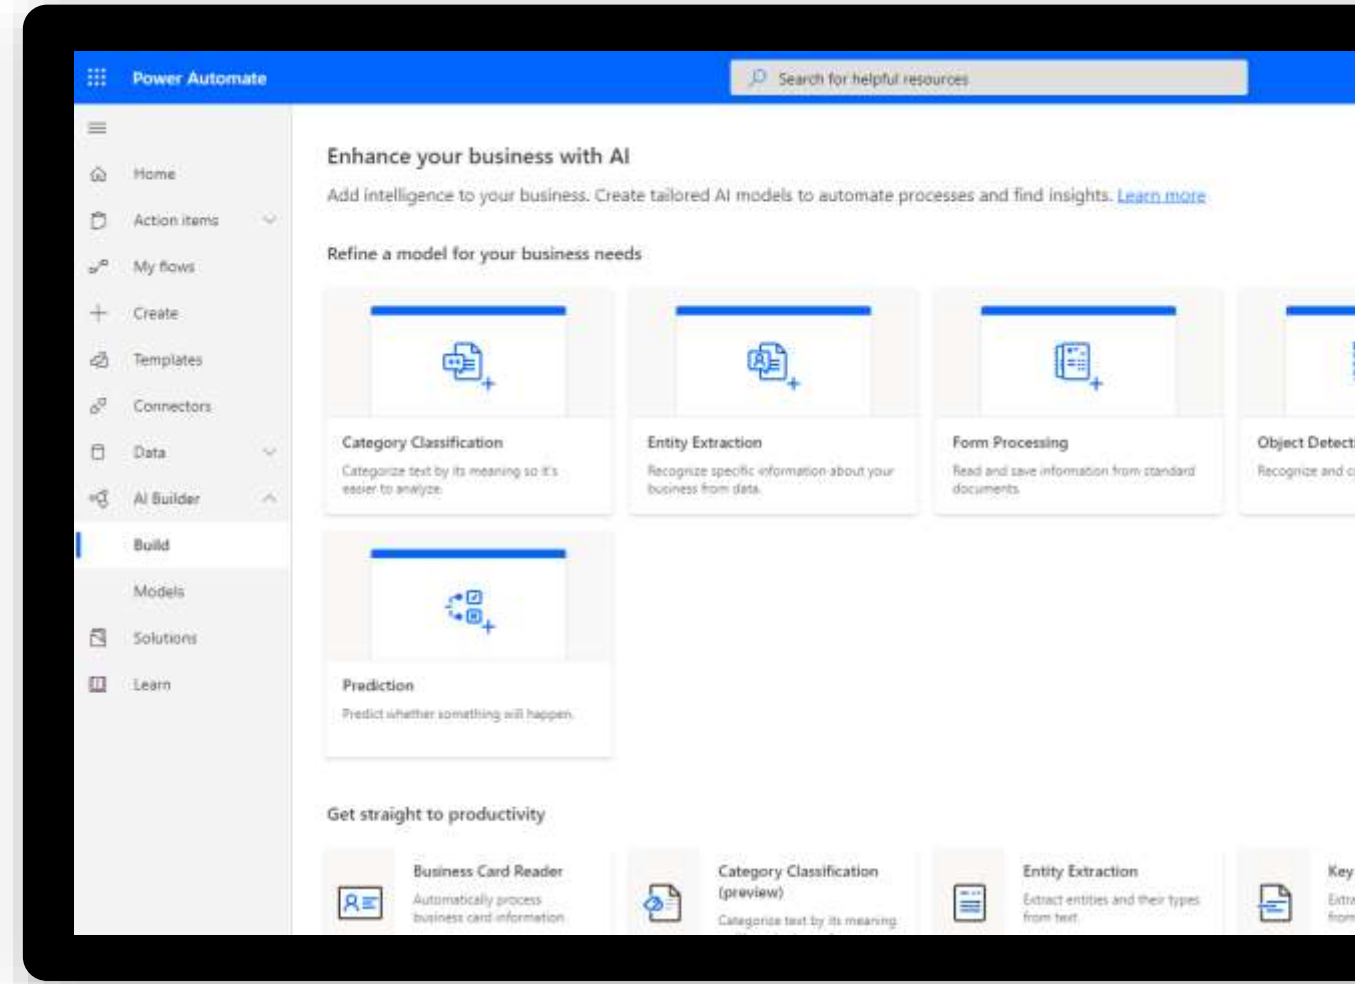

- Jumpstart apps using an **extensible data model** with business logic, security and integration built in.
- **Support all your data:** relational data, file and blob storage, logs and search indexing.
- Effortless Dynamics 365, Office 365 and Azure **integration**.
- **Role-based security** allows you to control access to tables for different users within your organization.

AI Builder

Low code AI for apps and processes

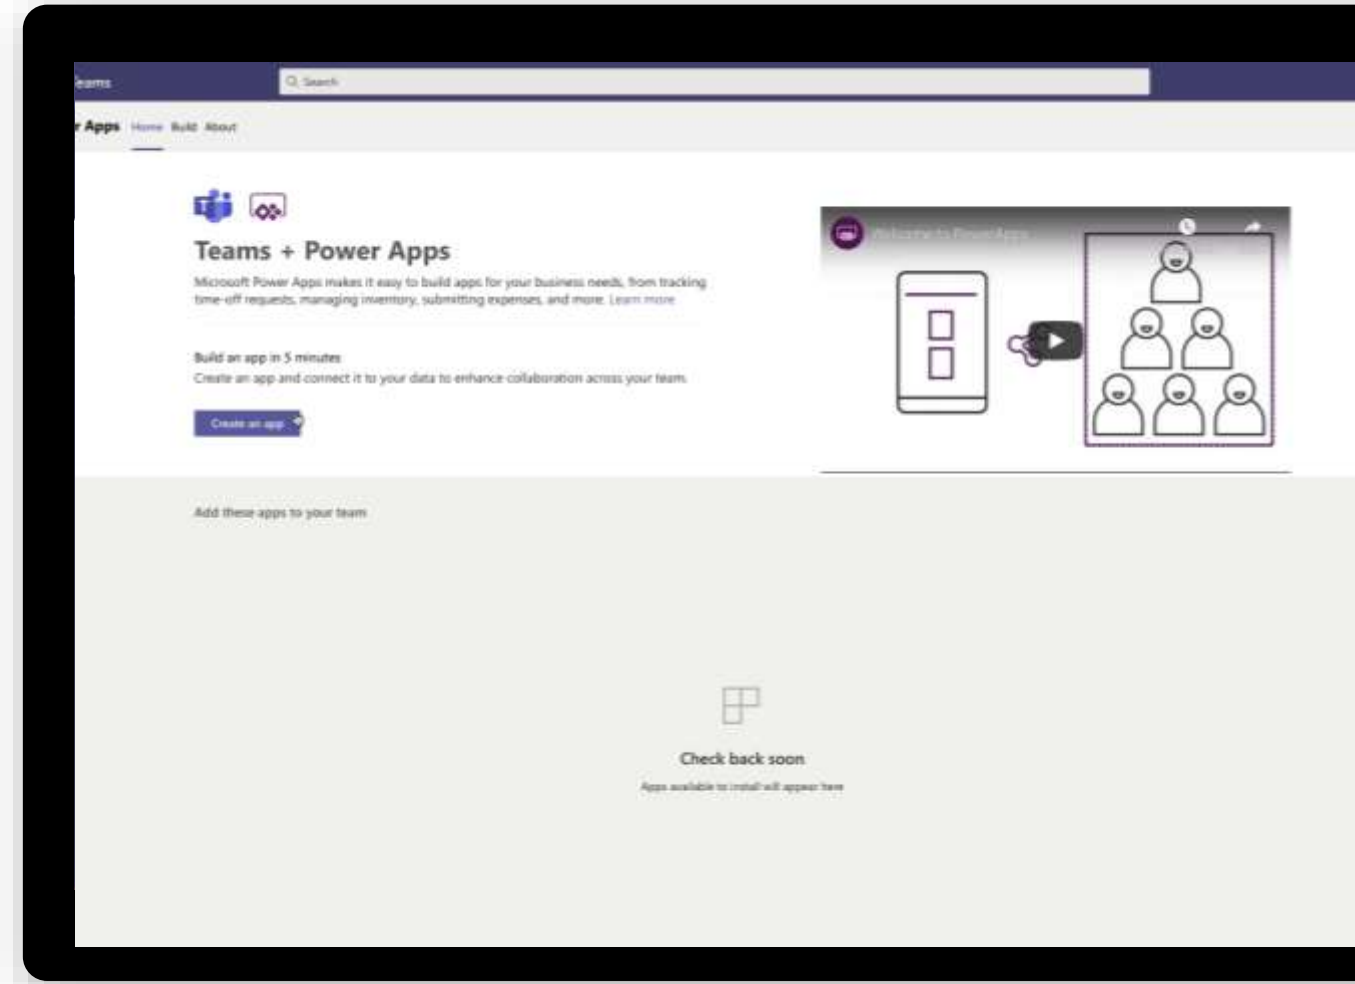

- **Low code AI solutions** for Power Platform leveraging the power of Azure AI.
- **Native integration** with Common Data Service enables data from CDS, Azure Data Lakes.
- **Leverage predictions** directly from Common Data Service across your Power Platform solutions, Dynamics 365 or Microsoft 365.

Power Platform + Microsoft Teams

Low code AI for apps and processes

- **Microsoft Dataverse for Teams** - a structured data store ideal for personal/team productivity apps used by a small groups
- **Power Platform integration** – embed and build interactive apps, reports, bots and automation directly in Microsoft Teams channels and chats.

Microsoft Power Platform

The low-code platform that spans Office 365, Azure, Dynamics 365, and standalone applications

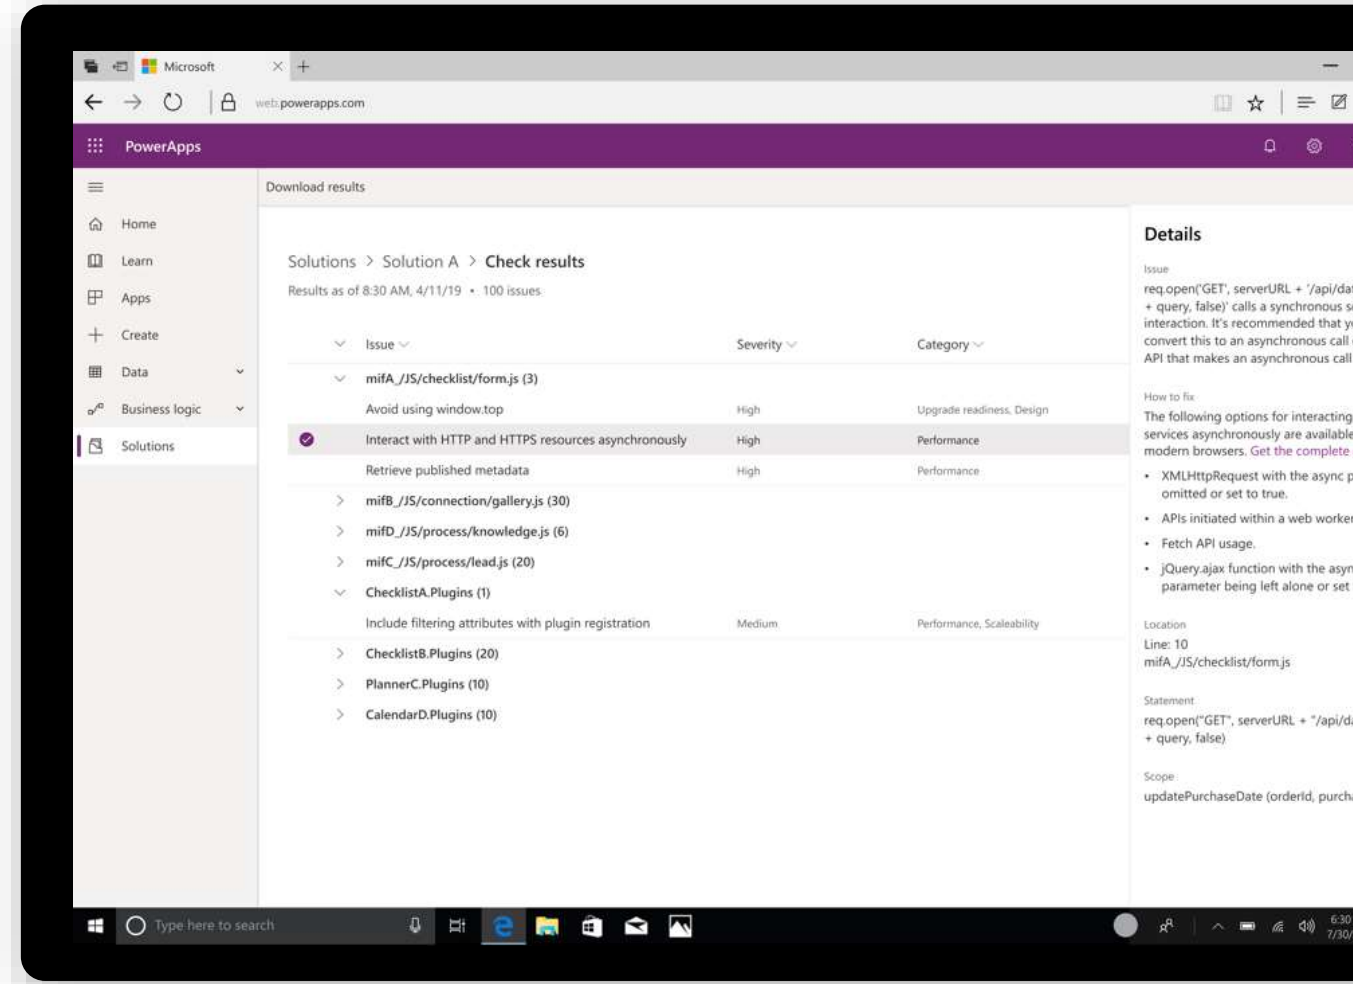

DEVELOPERS: Build without limits

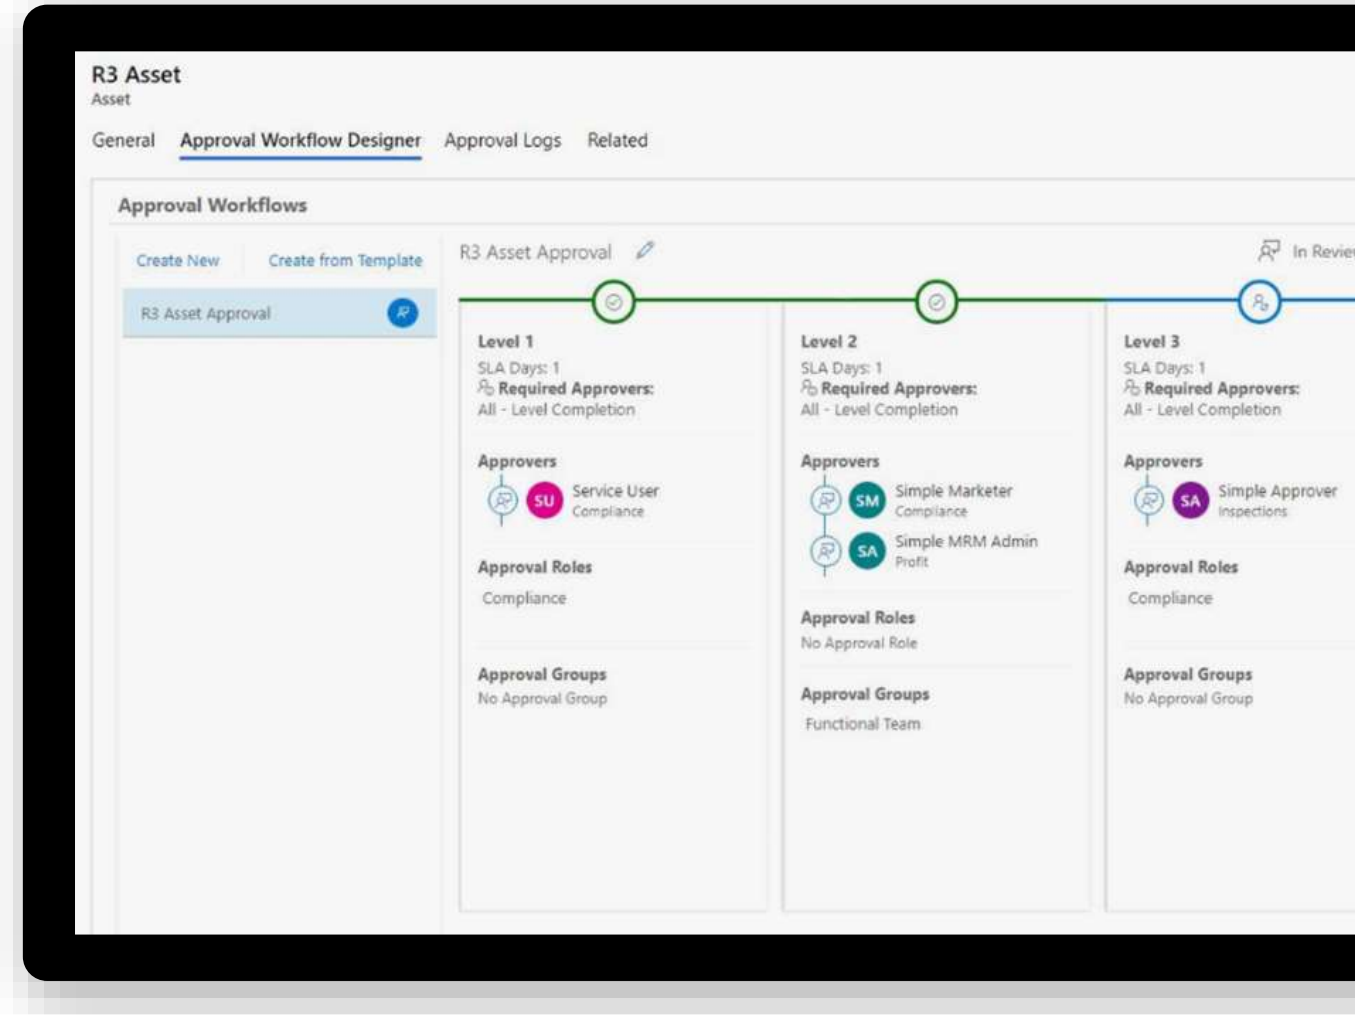

Amplify professional developer productivity

- **Extend applications using custom code** while leveraging Azure functions and services
- Write **advanced client or server-side logic** leveraging Azure Machine Learning, Cognitive Services, Bing APIs, custom code, or any service of your choice
- **Leverage solutions** for seamless deployments and error-free apps

Build custom components with the Power Apps component framework

- Developers can **build compelling visual components** for Power Apps.
- **Custom components** are responsive, reusable and support multiple form factors.
- **Reuse your current IP** or build using Visual Studio or Visual Studio Code
- Use **common frameworks** like React and command-line tools for building and testing.

Unlock access to any data source with custom connectors

- Communicate with services that are not available as prebuilt connectors.
- Create connector using our in-product wizards in Power Platform
- Connectors in Power Automate can include your own triggers and actions.
- Connectors in Power BI can include your own logic and credential options.

BUILD API

Start with API for data source or builds new API.

BUILD CONNECTOR

Define connector using custom connector wizard or Power Query SDK.

BUILD SOLUTION

Citizen developer selects custom connector to build app, dashboard, etc.

SHARE CONNECTOR

Add connector to Power Platform or share directly with citizen developers.

Add even more power to the Power Platform

Automate the build process with DevOps

The Microsoft Power Platform Build Tools allows anyone to setup DevOps for low-code and pro-code application development for Power Apps, Power Automate, Power Virtual Agents

Power Platform + GitHub

Develop, test, and deliver applications with GitHub Actions for Power Platform

Seamlessly manage solutions and environments

Empower developers to work within the tool of their choice by creating their own software development life cycle (SDLC) workflows or use pre-configured templates with GitHub actions for Power Platform.

Enable everyone to contribute to CI/CD

Empower citizen developers to perform self-service continuous integration/continuous delivery (CI/CD) to free up time for DevOps engineers and IT admins. With a full line of sight for IT admins and professional developers, users no longer need to worry about disconnected environments.

Seamless Fusion teams with coders and citizen devs

Create seamless Center of Excellence (CoE) team interactions by empowering citizen developers to trigger GitHub actions for Power Platform such as using Power Automate to construct CI/CD or build UX for self-service CI/CD.

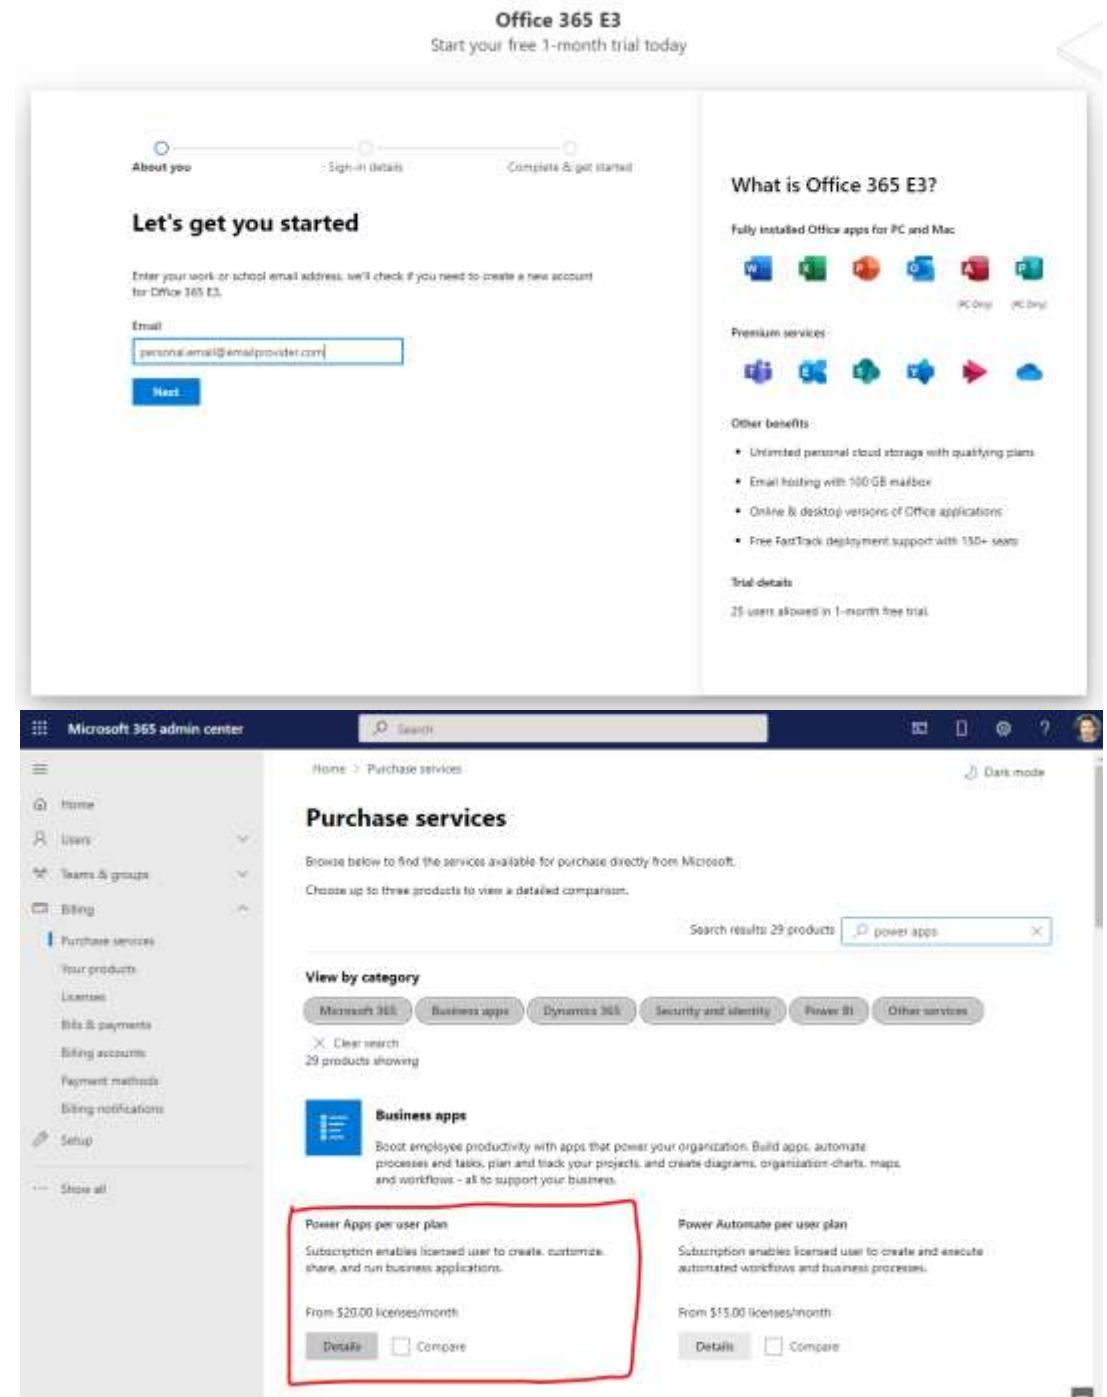

Getting Started!!

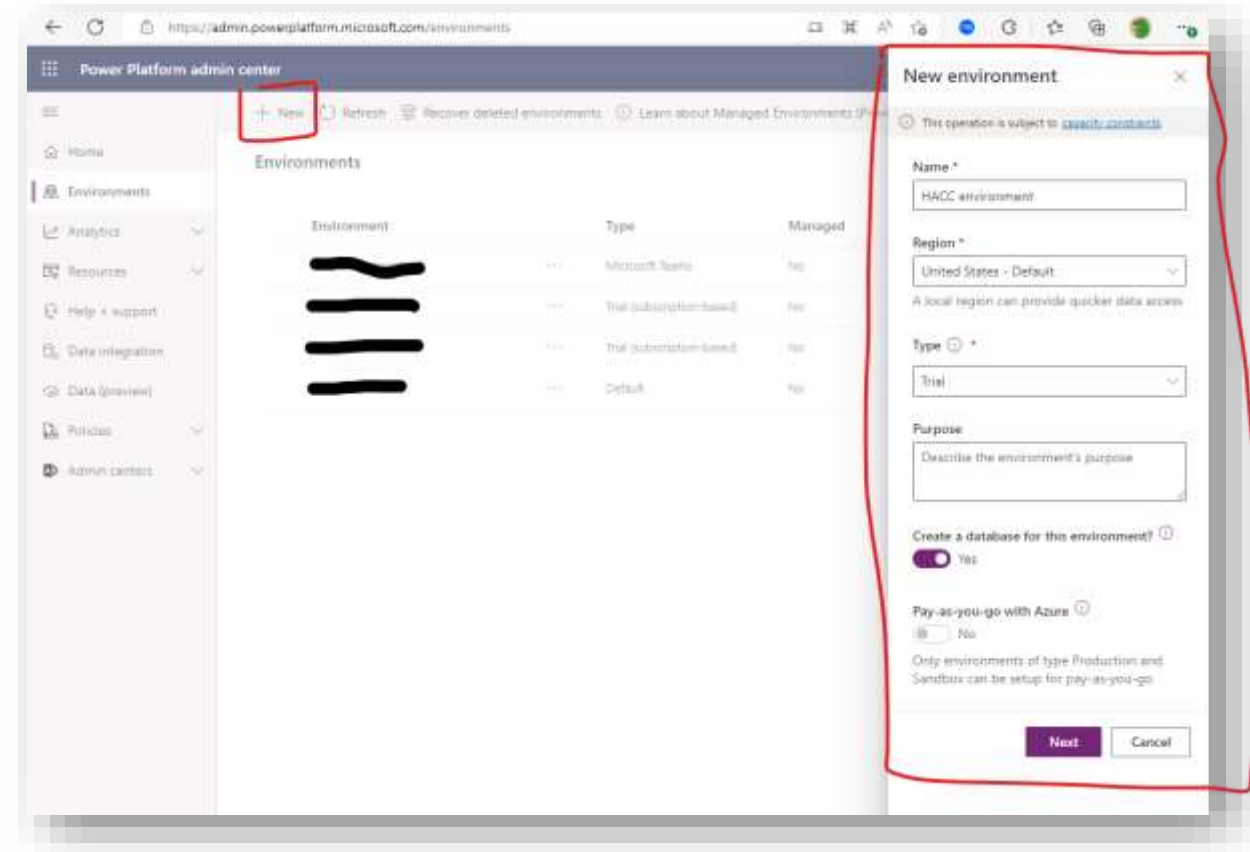

Getting Access to the Power Platform

1. Sign up for an Office 365 trial: [Office 365 E3 - Sign up \(microsoft.com\)](https://www.microsoft.com/office/365/trial). Use a personal email account and follow the prompts...
2. Once the sign-up process is complete, go to “Manage Subscription” (or <https://portal.office.com/adminportal>)
3. Go to Billing > Purchase Services and search for “Power Apps”
4. Select “Power Apps per user plan” -> Details
5. Select “Start Free Trial”
6. At this point you may get a message about adding a billing address. Follow the prompts to add an address.
7. After saving the billing address, a Registration section will appear. Open that section and say, I don’t have a registration number.
8. Return to Step 3 and add the Power Apps trial.

Assign Licensing and Create an Environment

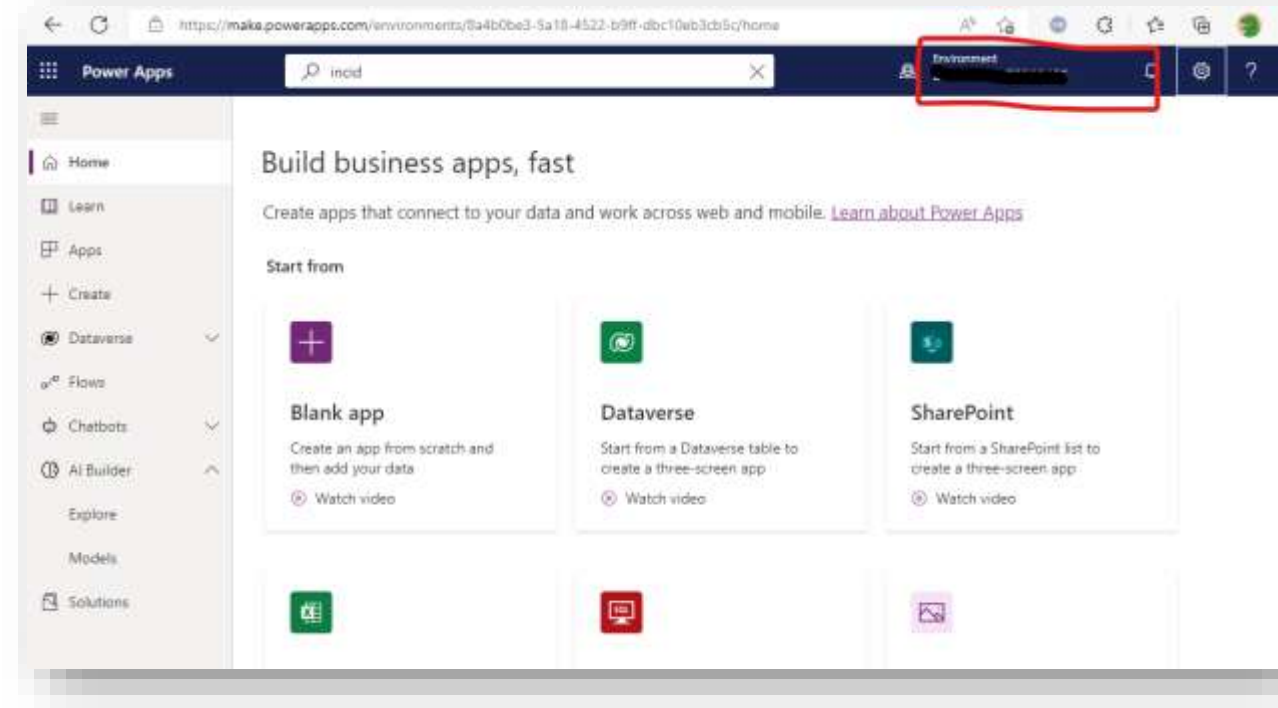

1. Once the Trial is Added, stay in the Admin Portal <https://portal.office.com/adminportal>
2. Open User and select your user to assign the needed licensing
3. Assign Office 365 Licenses and the Power Apps Per User License
4. Navigate to <https://admin.powerplatform.microsoft.com>
5. Create New Environment
 - a. Assign it a name
 - b. Choose "Trial" Type for environment
 - c. Choose "Yes" for "Create a database for this environment"
 - d. Click Save; the environment will take a few minutes to prepare

Go to the Maker Portal and Start Building!

1. Navigate to <https://make.powerapps.com>
2. Select the environment you just created in the upper right-hand corner
3. You now have a full tenant with trial licenses to build in!
